Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I	Claims 1-29, 67-79, 94-103 and 105-121 are drawn to a composition and kit, classified in class 424, subclass 70.31.
Group II	Claims 30-62 and 80-92 are drawn to a method for recovering proteins, classified in class 435, subclass 68.1.
Group III	Claims 63-66 are drawn to an apparatus, classified in class 435, subclass 283.1.
Group IV	Claims 93 and 104 are drawn to method of producing a cell extract, classified 435, subclass 243.

2. Groups (I and III) and II are product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a material different process of using that product (MPEP 806.05(h)). In the instant case, the invention of Group I can be used to lysis host cells.

3. Groups I and III are related as products. Groups I and III are distinct products, with different chemical structure and utilities.

4. Groups I and IV are product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a material different process of using that product (MPEP 806.05(h)). In the instant case, the invention of Group I can be used to recover proteins.

5. Groups II and IV are related as methods. They differ because they have different goals, require different method steps and parameters. The methods are independent and distinct as claimed.

6. Claims III and IV are unrelated as product made and method of making. The product of Group III are not required for the method of Group IV. The inventions are independent and distinct as claimed.

7. Because these inventions are distinct for the reasons given and have acquired a separate status in the art because of their recognized divergent subject matter as shown by their different classification, restriction for examination purposes as indicated is proper. Moreover, in the absence of restriction it would place an undue search and examination burden on the examiner.

8. Applicant is advised that the reply to this requirement to be complete must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
